

How we Excel ...

With a 25-year warranty
for your cabling and cabinets

Excel Cabling

All of our installations are covered by a 25-year product and application warranty, thanks to TSI being an accredited Excel Cabling Partner (ECP).

Excel is a world-class premium performance end-to-end infrastructure solution – designed, manufactured, supported and delivered – without compromise.

We offer a 25-year product and application warranty as standard on all installations we complete.

- Covers all Excel copper, fibre optic, voice cabling systems and Environ racks when installed as part of a complete Excel Solution.
- Excel Intelligent, Modular and Standard PDU's are covered by a 3-year warranty when installed as part of a complete Excel Solution.
- Issued to latest published standards.
- Bandwidth warranty. For example Category 6A warranties assure support of all applications current and future designed to operate at up to 500MHZ.

We are able to offer the warranty as an Excel Partner with current testing and training certification in place.

Training and accreditation is renewed bi-annually, on demand or at the launch of new Excel solutions or industry standards. We also attend annual Excel briefing events where we gain updates on solutions and best practice.

With an emphasis on compatibility and standards compliance “from cable to cabinet”, reliability and product availability, Excel is the complete trusted solution.

Since the brand was launched to the UK market in 1997, Excel has enjoyed formidable growth. This reflects a growing demand throughout EMEA for a reliable, standards-compliant, readily available, structured cabling and racking system.

With a focus on system performance, independent verification and the 25-year product and application warranty (when installed by TSI Voice & Data), it's easy to see why this is the system of choice in many government, education, retail, finance and enterprise installations.
